High-quality rail catering equipment

Rail catering trolley

Rail at-seat trolley

With more than twenty-five years of experience, Direct Air Flow offers its customers in the rail industry superior products and service. It supplies innovatively designed rail catering equipment. Rail catering trolleys can be manufactured with several panel finishing options, such as sublimation or silk screening. The lifespan of Direct Air Flow's rail containers is outstanding. Customers appreciate the superb quality of the rail containers which provide exceptional durability and offer a great return on investment. The at-seat rail trolleys enable staff to deliver food and beverages, providing an exceptional service experience for passengers. Extensive options are available, including integrated cabinets, cash drawers and a low-maintenance braking system.
