

Ultra-powered search- and floodlight

Pro-Star

NightSearcher's latest innovation, the Pro-Star, Ultra-Powered 8000 Lumens Search and Floodlight has been thoughtfully designed for both search and rescue and scene of crime sectors. This search- and floodlight is able to stand on its end for elevated height and has an adjustable 90° tilting head and adjustable shoulder straps for hands-free use. The compact hand-held unit has up to 20 hours runtime in search mode and selectable settings of 2 beam widths. A long-distance searchlight function of a 1000-metre beam and a wide-angled floodlight are perfectly suited for crime scenes at 8000 lumens. At the touch of a button, Pro-Star easily runs through a choice of 9 sequential modes to include; Boost, Search, Flood, SOS, Strobe and Dimmable that are available in Full, Half and Low.
