WELDYX MASTER – New high-performance adhesive in certified quality

GLUETEC: WELDYX MASTER 5: High-performance adhesive in certified quality

Under the motto "Maximum safety - high-performance adhesives in certified quality", GLUETEC will be presenting the latest generation of structural adhesives. WELDYX MASTER has been developed specifically to meet the requirements of railway applications, is compatible with all common substrates of the railway industry and even fulfills the guidelines for rail vehicles with high risk category (DIN EN 45545-2, R1 HL3). With WELDYX MASTER, structural, high-strength and at the same time flexible and highly resistant bonds are possible. The 2-component methyl methacrylate adhesive in a mixing ratio of 10:1 is available in processing times of 5 and 15 minutes. WELDYX MASTER is a high-performance adhesive developed for structural bonding of metals, composites and plastics. Compared to others, WELDYX MASTER scores with even lower shrinkage behaviour and longer reaction time. These properties were also confirmed in a product analysis by the Fraunhofer LBF Institute.
