GEMINIS GR3-W wheel hub boring machine

GR3-W wheel hub boring machine

Geminis, the brand of the manufacturer Goratu, will present a new wheel hub boring machine at InnoTrans 2018. This will be the first time the vertical machine for boring applications is shown at a trade fair. The GB3-W integrates the latest technologies and some of its most important features are: special design for hub boring application, easy to use interface, automatic tool change, integration of wheel hub measuring system, automatic report generation, hydraulic autocentering of chuck. Geminis machines specializes in machining of axles, wheelsets and wheels. Geminis has a track record of more than 60 years supplying highly demanding machining solutions and service all over the world.
