Seamlessly connected with Colibri

Seamless connectivity

At InnoTrans 2016, DB Fahrzeuginstandhaltung unveiled its new product series Colibri (Coach Link for Broadband Information exchange). The solution includes IT products and services, such as real-time vehicle location and diagnosis, automatic passenger counting and Wi-Fi offerings. InnoTrans 2018 is dedicated to the latest generation of passenger information and innovative methods for safety systems, diagnosis and effective vehicle upgrades. At the heart of the new concept is the seamless connectivity between train, station and subsequent connections of local public transportation.
