Seating expertise for train drivers

Be-Ge 3400 rail seats fulfil EN 45545

The well-known driver's seat manufacturer Be-Ge has further developed its service within the railway industry, a Competence Centre for Railway Seating applications is established at Be-Ge Savas Seating BV, located in Zaltbommel in the Netherlands. The driver's seats are designed, manufactured and assembled at the Be-Ge production plant in Oskarshamn, Sweden. The experienced team at the Competence Center for Railway Seating at Be-Ge Savas Seating will serve customers both for refurbishment and service of rolling stock as well as for new projects. At InnoTrans Be-Ge will show their seating products, adapted to meet the standards for rail vehicles, fulfilling EN 45545 among other standards.
