Customised wash systems for all rolling stocks

Customised wash systems for all rolling stocks

Top-quality wash with minimum maintenance

ISTOBAL, a multinational group leader in wash and care solutions for all transport vehicles, will present customised wash systems for all rolling stocks at InnoTrans 2018. Through its ISTOBAL FDI+ railway division, the Spanish group will show the latest developments in customised wash systems for trains, trams and metros, ensuring an efficient and top-quality wash with minimum maintenance and impact on the environment. Rolling stock wash equipment by ISTOBAL FDI+ stands out for its ability to adapt to customer needs thanks to a thorough developing process, from the first sketch to the final set-up. This adaptability enables to install the equipment on new washing stations, but also to fit it in existing facilities.
