

Repair & Maintenance 4.0 – Digitization for shop floors

Understanding of real-time and historic operations data to act rapidly and to improve accordingly

Process security and productivity with digital inspections, workbooks and step-by-step instructions

Actyx provides fully managed solutions for repair & maintenance shop floors, but without the risk or complexity traditionally associated with IT-projects. This enables companies to profit from digitization and increase their productivity, quality and flexibility. With standard applications, a valuable solution concept is developed, implemented and installed in weeks not months – all without a single invoice. Also, the whole operation of the mission-critical solution is included: no IT complexity is added and no IT resources are needed.
