Full package low-GWP solutions for mobile air conditioning manufacturers

Horizontal compressor incl. inverter driver

AREA Cooling Solutions, the official distributor for Bristol, Panasonic and GMCC compressors in Europe is going to present the newest and ecofriendly solutions for mobile air-conditioning applications. The company's R&D department has developed the best solution available in order to support the customers in the mobile air-conditioning systems development, taking into account the latest European environmental regulations. AREA Cooling Solutions can offer inverter solutions for horizontal and vertical compressors for low-GWP refrigerants like CO₂, R1234yf, R513A, and R134a together with drivers for standard voltage and 750 V for full electrical buses. The innovative range starts from 5 kW and goes up to 34 kW with more than 50,000 compressors already working in Europe.
