Lanolin-based lubricants for superior protection

PROLAN PROTECTIVE LANOLIN – HEAVY: Corrosion protection for everything from cars to offshore install

The full range of PROLAN products

DENREX delivers high-quality products from New Zealand such as PROLAN. These are environmentally-friendly lanolin-based industrial lubricants, corrosion inhibitors and anti-seize grease lubes for use in shipbuilding, car production, electronics, agriculture and industrial manufacturing. As a market leader, PROLAN New Zealand uses a specialized process to convert raw wool grease into a range of non-toxic, environmentally-friendly lubricants and corrosion inhibitors that are safe and easy to apply. PROLAN is a fantastic natural product which provides long-lasting corrosion protection for any metal surface; it is resistant to most mineral acids and salts.
