

Smart air filter monitoring with Senzit

-  Protects your engine and equipment
-  Saves time and reduces frequency of air filter maintenance
-  Enables prolonged filter life
-  Built to meet your demands in all terrains, even under the harshest conditions
-  Works with filters of all brands

Senzit ensures air filter service life can be exploited to the full

Senzit enables the condition of air filters in cars and machines to be monitored anytime, anywhere. MANN+HUMMEL offers a smart device which displays an overview of all service-related facts, such as soiling status or remaining service life of the air filter, machine operating hours or the location of the machine. Senzit is rugged and sturdy and was developed for use in harsh environments. Practical and simple, the unit helps to ensure efficient filter maintenance, reduces machinery downtimes with realtime filter status, and the Senzit app (iOS and Android). Senzit ensures air filter service life can be exploited to the full
