Integrated mobile and wayside video surveillance

Mobile ME4 IR MicDome captures HD video, with IR LEDs and built-in mic to guard against moisture

RideSafe RT Series IP Recorders and Command for Transit software with integrated vehicle metadata

March Networks provides rail, bus and paratransit operators with integrated mobile and wayside video surveillance systems managed with enterprise management software. The intelligent solution allows operators to enhance security, respond quickly and resolve liability claims faster using clear video evidence and integrated data from Train Control and Management, Passenger Information and CAD/AVL systems, GPS and other devices. The solution supports rapid search, centralized video management and cellular real-time communication. March Networks offers the industry's most reliable video recorders with EN50155 compliance and support for IP and hybrid video capture, as well as ruggedized cameras purpose-built for demanding mobile applications.
