## LaneLED WALL lighting system – universally applicable, continuous LED lighting

Ceiling lightings LaneLED WALL – Handrail LaneLED INOX 42

Emergency escape route lighting LaneLED Wall

The light bar «LaneLED» from GIFAS is the base element for the illuminated handrails LaneLED INOX 48, INOX 42, GFK as well as LaneLED WALL which are used for diverse continuous lighting applications. The correct type is selected depending on the project and light requirements. This new product is based on our 20 years of know-how with LED guidance systems for road and railway tunnels. The main feature of LaneLED WALL is its compact and small structure combined with its excellent luminous efficiency. Installation and assembly can be carried out wherever is little space available. The smallest possible dimensions with an inconspicuous installation as result.
