## AC-900 axle counter system

AC-900

The AC-900 axle counter system presented by ICF features the latest technical innovations and SIL4 certification. With the aid of SDE-900 axle sensor detectors, the system meets all current international specifications, allowing multiple configurations and unparalleled flexibility. The capability of connecting equipment via radio or wire and implementing a solar power supply creates an eco-friendly system with reduced civil works, minimum environmental impact and high reduction in costs. All these specifications and the ability to connect up to eight SDE-900 axle sensors to the same cable reduces the costs drastically and ranks it as one of the most competitive systems on the market.
