TRDP integration made easy: TRDP Analyzer

NTOnTrack TRDP Analyzer

TRDP integration poses major challenges for manufacturers of train components. NewTec can help: The specialist for TCN security has played a leading role in TRDP development. NewTec tools and services facilitate to develop customized TRDP solutions, implement interfaces or automatically test for standard conformity, interoperability, security and robustness. The new NTOnTrack TRDP Analyzer is the world's first network protocol analyzer for TRDP: It logs and monitors TRDP telegrams and offers extensive functions for checking, filtering, sorting, evaluation and visualization. The flexible solution already includes several test and simulation modules and can be expanded into a comprehensive test and inspection tool for TRDP compliance tests.
