Hexagon introduces the Leica Pegasus:Two Ultimate

Leica Pegasus:Two Ultimate mobile sensor platform

Hexagon AB, a global leader in digital solutions, will be showcasing the Leica Pegasus:Two Ultimate, an updated version of the Pegasus:Two, Leica Geosystem's trusted mobile mapping platform. With a new 360-degree 24 MP camera system, the Leica Pegasus:Two Ultimate provides stitching free panoramic images calibrated to the LiDAR profiler data, and enables digital reality captures from train, car, or boat. Digitisation of rail or road infrastructure is the foundation of increasing efficiency of new and legacy networks – leading to digital transformation. The Leica Pegasus:Two Ultimate provides survey-grade 3D information for transport infrastructure including as-built new construction, clearances, best-fit geometry, incident response, GIS, and track alignment.
