## Complete range of mobile solutions for businesses

A new generation of rugged touch mobile computers, EF401, EF501 and EF501R

With Android 7.x Bluebird launches the new EF401, EF501 and EF501R into a new generation of rugged touch mobile computers. Thanks to the powerful 2.0 GHz Octa Core processor and 2 GHz RAM, even the most complex applications can run quickly and reliably – the exchangeable high-performance battery with 6,020 mAh (EF401) or 6,400 mAh (EF501 and EF501R) keeps the devices up to daily work. Equipped with the proven 1D and 2D Imager, the newly launched devices can read all common barcodes and the integrated brand-new WLAN delivers a very high transmission speed.
