Innovation and new standards in passenger and freight transport

Cityjet eco

Rail Cargo Group platform truck

The ÖBB group is presenting two world debuts at InnoTrans 2018. Together with Siemens, ÖBB Personenverkehr AG is presenting a battery-powered prototype for sustainable, emission-free railway operations. An ÖBB Cityjet DESIRO ML serial vehicle has also been retrofitted with a battery. The ÖBB Cityjet eco is suitable for use on non-electrified or semi-electrified routes. TransANT – Less weight – more freight – platform trucks set new standards in efficiency and flexibility. The platform truck scores high on modularity and flexibility, offering more sustainable transport.

Österreichische Bundesbahnen
